ABOUT ME

As a self-motivated Software Developer with over two years of experience in C++, I have been involved in several open-source projects for writing, testing, and deploying. I have managed to be involved in the design, planning, development, testing, and production start-up of multiple projects. My proficiency in popular coding languages including Python, JavaScript, and C++ and frameworks or systems such as Flask and Git, along with my excellent knowledge of the software development life cycle, makes me a strong candidate for software developer positions. I have strong problem-solving and communication skills, knowledge of Object-Relational Mapping frameworks, and experience with Agile and Scrum development methodologies. I am able to learn quickly and work independently or as part of a team.
